| Job Description: | | | |
| <p>As Software Developer, you will be working within a small, collaborative team, building and enhancing an already innovative lending platform using an Agile/Scrum methodology. This platform is based on the Ruby On Rails. You will be involved in developing all parts of the application stretching from tests, database queries, front-end UI, to deployment engineering and code refactoring. Ruby, Rails 3, TeamCity, MySQL, jQuery, HAML, SASS and Git are some of the tools you will be using.</p> | | | |
| Responsibilities: | | | |
| <ul style="list-style-type: none"> • Design, prototype, develop, test maintain web-based applications with backend components. • Refine the software to continuously improve its performance and usability. • Improve front-end JavaScript functionality to provide for a better user experience. • Add new features to drive user engagement and add value. • Writing unit tests and working closely with QA for bug fixing. | | | |

- Be involved in low level design decisions and regular peer code reviews.

Requirements:

- Passionate about building great software; and finding ways to make it better
- Bachelor's degree in Computer Science, Engineering, related discipline or equivalent in experience.
- Minimum of 2-3 years of software/web development experience
- At least 1 year of experience coding in Ruby on Rails.
- Fluent in HTML/CSS and JavaScript/jQuery.
- Ability to communicate and deliver creative solutions on time.
- Ability to work on the whole application stack: OS (Ubuntu/Redhat) / DB (MySQL) / MVC Development Framework/JS / CSS/ HTML.
- Ability to work with HAML/JQuery/SASS/Linux/SQL
- Team player, flexible and willing to multitask
- Strong work ethic and professionalism
- Good communication skills
- Very strong analytical and problem-solving skills.
- Ability to build on team knowledge sharing.
- Values code esthetics.

Assets:

- Familiar with financial platform/industry.
